

Thy Vu

Skills Summary

- Currently a Canadian citizen authorized to work in the U.S.
- Experienced in project managing large-scale programs valued at over \$1 million to international markets for clients such as Novo Nordisk and GlaxoSmithKline
- Highly adaptable working in fast-paced environments and have had great exposure from experiences at a high-growth energy software tech company and a biotech start-up company
- Strong analytical skills gained from research and translational experience

Recent Experience

Technical Success Manager, Validere Technologies Inc. (Toronto, Canada) Dec. 2019 – Sep 2022

- Managed logistics and technical deliverables of the company's software platform deployments ranging from \$50K to \$500K in value
- Collaborated with cross-functional teams (data science, services, engineering) to ensure alignment on expectations, responsibilities, timelines.
- Managed client communications on updates, data permissions requests, vendors
- Initiated and maintained vendor partner relationships, and end-to-end execution on agreed scope
- Oversaw client account budgets and project invoices to monitor scope expenses

Senior Project Manager, MDBriefCase Group Inc. (Toronto, Canada) May 2017 – Nov. 2019

- Led the development of online continuing medical education (CME) programs from requirements definition through deployment, identifying schedules, scopes of work, budget estimations, and timelines of project deliverables. These projects totaled over \$1M in value.
- Co-ordinated internal and external stakeholders (including those in global markets), ensuring projects remain within scope, schedule, and defined budgets, in collaboration with project staff across several functional departments (e.g. - UX design, content development, marketing)
- Analyzed project progress and, when necessary, adapted scope, timelines, and costs to ensure that project requirements are met
- Established and maintained productive relationships with key global pharmaceutical client stakeholders and medical partners, providing regular contact on project status and changes

Product Development Lead, Kenota Health (prev. ExVivo Labs Inc.), (Kitchener, Canada) Nov. 2016 – Apr. 2017

- Project manager of core R&D team and external research partners to progress the development of the company's proprietary medical device for the allergy testing market
- Recruited and managed core R&D personnel
- Implemented preliminary development protocols into the company's Quality Management System
