

## **Formulating Colour Cosmetic Chemist**

At Cosmetica, we're carving out our place as the go-to trendsetter in custom cosmetic development and manufacturing. We offer an unparalleled array of turnkey services such as product development, R+D, QA/QC services, client services and manufacturing solutions for big name beauty brands within the cosmetic industry.

Cosmetica has a simple strategy: the best innovation, the best execution and service, the best speed-to-market, and the best people.

### **Could that be you?**

As a key member of our dynamic team, you will participate in the development of new and innovative formulations within the colour cosmetics category working in partnership with our Product Development Team to assess each project and allocating the proper resources.

### **Your responsibilities will include:**

- Oversee and innovate / develop new and improved products in colour cosmetics and you must possess excellent colour matching skills
- Multi-task under pressure and manage multiple projects on an on-going basis while displaying self-discipline, motivation and a strong work ethic
- Possess excellent organizational, interpersonal & computer skills
- Review and / or develop specifications for new products for suitability with existing manufacturing systems and feasibility of other advanced technologies
- Excellent problem solving skills including ability to evaluate technical problems and provides recommendations for corrective actions

### **Why work here?**

Cosmetica is growing rapidly, and that means opportunities to learn, grow, and be challenged in everything that you do.

This is a full-time, permanent position with a comprehensive benefits plan, and vacation.

Cosmetica works to foster an environment that is supportive, with a keen focus on growth and positivity. We know that succeeding means achieving goals together and we're always looking for ways to improve the culture that makes things easy for management and workers alike.

### **Qualifications**

- A minimum of a Bachelor Science in Chemistry coupled with a minimum of 5 years laboratory experience that is inclusive of experience in colour cosmetic formulation.
- A strong leadership aptitude
- Supervisory experience would be a definite asset.

## How to Apply
